SqBx

Asset Tracking

Fixed asset tracking allows your organization to control its fixed assets. Maintaining logs of who has an item and where it is located is tedious and can lead to costly errors. SqBx Asset tracking software offers an accessible solution to pinpoint, manage, audit, check in and out fixed assets. Enjoy big time savings by performing functions on the mobile app.

KEY FEATURES

CLOUD BASED

No software installation needed. Access from any internet enabled device with credentials. Software updates are included.

FREE LIVE SUPPORT

Get instant access to technical support for any issues concerning account services, hardware, or system updates via phone and email.

MOBILITY OPTIONS

Save time and perform actions on the go. Check in and out assets, assign to custodian or location, and perform asset audits.

ADMIN CONTROL

Establish security rights for each user group with visibility permissions. **Plethora of Report Options.** Add notes, images, warranties, maintenance needs, and attachments to keep quality records for all assets.

PINPOINT ASSETS

Perform asset audits by location or custodian. You can even add unexpected assets on the fly.

VEHICLE TRACKING MODULE

Track your company vehicles: location, status, and maintenance needs through the use of SqBx's on-board diagnostics devices.

RFID

Skip the manual steps of locating and scanning bar codes. Track multiple asset tags simultaneously without having to require a line-of-sight.

MAINTENANCE ALERTS

Generate calendar-based maintenance alerts as well as meter-based PMs and send out as email or text messages. **Flag missing and past due items.**

Allocadence is a cloud-based inventory management system that was built from the ground up to capitalize on web and mobile technologies. The end result offers a modernized inventory management tool that simplifies inventory management, saves time, and reduces human error.

INVENTORY MANAGEMENT

Allocadence makes it easy to manage your inventory with customizable automation to match your internal processes. Throw away the spreadsheets and automatically track quantities in real time with alerts to notify you when it is time to reorder.

PURCHASING & RECEIVING PROCESS

Using a computer, tablet, mobile computer, or handheld device, Allocadence's purchase order and receiving processes ensure that incoming stock is handled accurately and efficiently. Inventory levels are updated based on the actual quantities received, with a helpful alert when there are variances from the supplier.

REPORTING

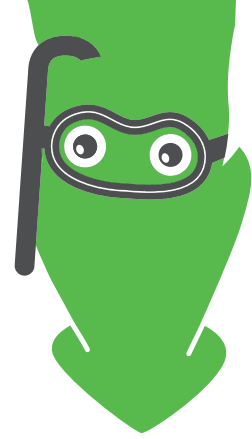

Get thorough reporting at the touch of a button. You can download reports on your inventory, shipments, purchasing, and more - conveniently formatted as PDF or CSV file.

KEY FEATURES INCLUDE:

Multi-warehouse and Multi-location support including transfers and stock requests, Vendor management and purchasing, configurable alerts based on system events, cycle count management, configurable lexicon to tailor interface to your specific organizational needs. **Mobile Inventory App available.**

MODULE POWER

PO INTEGRATION

Receive packages, reconcile purchase order line items, and deliver with one application

PRINT JOB TRACKING

Send automatic notifications for every stage of your print job process
